FÁBRICA ARTESANAL TAPETES BEIRIZ

EXCEPTIONAL QUALITY HANDCRAFTED RUGS, SINCE 1919

Established in 1919 in the area that the company's name derives from, our carpets, still crafted today in Beiriz, Portugal, are the result of the passion and skill of extraordinary artisans dedicated to this timeless art. Our brand represents a story that connects with many others, as those who choose us create not just a carpet, but a narrative for life.

The story of Beiriz Carpets began over 100 years ago in the small parish of Beiriz in Póvoa de Varzim, where it witnessed the creation of the first carpets bearing its name.

Production grew rapidly, and the factory gained significant recognition, with the founders receiving several awards at national and international exhibitions.

CRAFTSMANSHIP

Our craftsmanship reflects a deep commitment to tradition and excellence in every carefully executed detail. It embodies the artistry of skilled artisans, showcasing a harmonious blend of heritage and innovation while ensuring the highest standards of quality and design.

CRAFTSMANSHIP

THE ARTISTRY OF BEIRIZ

At Beiriz, our craftsmanship is rooted in a rich history that dates back over a century. In the early days, our factory utilized hand-drawn designs on technical paper sheets, where each tiny square represented an individual knot created by the skilled hands of our artisans. This meticulous process was essential for crafting the renowned Beiriz knot, which has become synonymous with our brand.

As the world has evolved, so too has our approach to craftsmanship. While we continue to honour the traditional techniques that define our heritage, we have embraced innovation to enhance our production methods.

Initially, our rugs were crafted exclusively from 100% wool, which was the only material used at the time and is still considered the most reliable. Today, we have expanded our repertoire

to include sustainable materials such as bamboo, Tencel, Cotton, and Recycled Polyester. These additions enable us to accommodate a wide range of projects, utilizing the finest yarns for intricate details and desired textures.

While our craftsmanship and materials have evolved, the passion for production and expertise that has defined Beiriz for over a century remains unwavering. We skilfully mix these exceptional materials to achieve the desired effects, or we may choose to highlight their unique compositions in their purest form.

DESIGN, SAMPLING, TUFTING AND FINISHING

Our colour palette has also expanded, showcasing a rich spectrum of hues that was not available in the past. Our design team focuses not only on creating stunning designs but also on utilizing various techniques to achieve depth and intricate details.

This dedication, combined with the expertise of our artisans, allows us to masterfully translate our clients' visions into their dream carpets.

We design and accommodate any requests our clientele may have, producing samples to showcase the importance of selecting the right materials, colours, and techniques. Our Team is committed to maintaining the Beiriz brand's integrity while always leaving room for innovation.

We utilize hand tufting techniques, allowing us to excel in meeting specific requirements and details, ensuring

every carpet is beautifully completed by hand. Every aspect of carpet production is approached with dedication. The finishing touches are meticulously crafted, whether it involves shearing, trimming, or carving.

We also ensure that each carpet is carefully packaged for secure shipment, guaranteeing safe arrival at its destination. The complexity of each step in the process reflects a commitment to quality and craftsmanship, and it is this dedication that makes us proud to carry the Beiriz name.

COLLECTION

At Beiriz, we understand that selecting the ideal carpet is more than just a choice—it's an expression of your unique style and vision. Our dedicated design team is here to collaborate with you, ensuring that every detail aligns with your specifications.

As you explore our extensive collections, let your imagination guide you through our diverse categories: **Geometric**, **Organic**, **Gradient**, **Texture**, **Floral**, and **Classic**. Each category offers a distinct aesthetic, allowing you to find the perfect piece that complements your space.

MADE TO MEASURE

All Beiriz hand-tufted carpets are created by a process that combines hand craftsmanship with high precision. From start to finish, our made-to-measure carpets go through a rigorous design and development process, ensuring that each piece is tailored to the exact size, shape and colour adjustments required. All rugs are created to custom dimensions. Colours can be selected from the Beiriz Pom Boxes, an extensive and sophisticated colour palette system.

TEXTURES & YARNS

As with all Beiriz custom rugs, texture and yarn choice are paramount in determining the character and aesthetic of the final product. Beiriz hand-tufted rugs can be produced in cut pile, loop, cut-and-loop, or shag pile, and are available in the same yarns used in Beiriz's finest collections.

COLOUR MATCHING

Colour plays an important role in bringing rug designs to life and capturing the inspiration behind them. When developing custom colours for proposals, Beiriz makes every effort to match them in the final production dyeing. We use the best dyes and the finest fibres available, using state of the art equipment during the process. While an exact match is impossible, we will always pursue the best possible match.

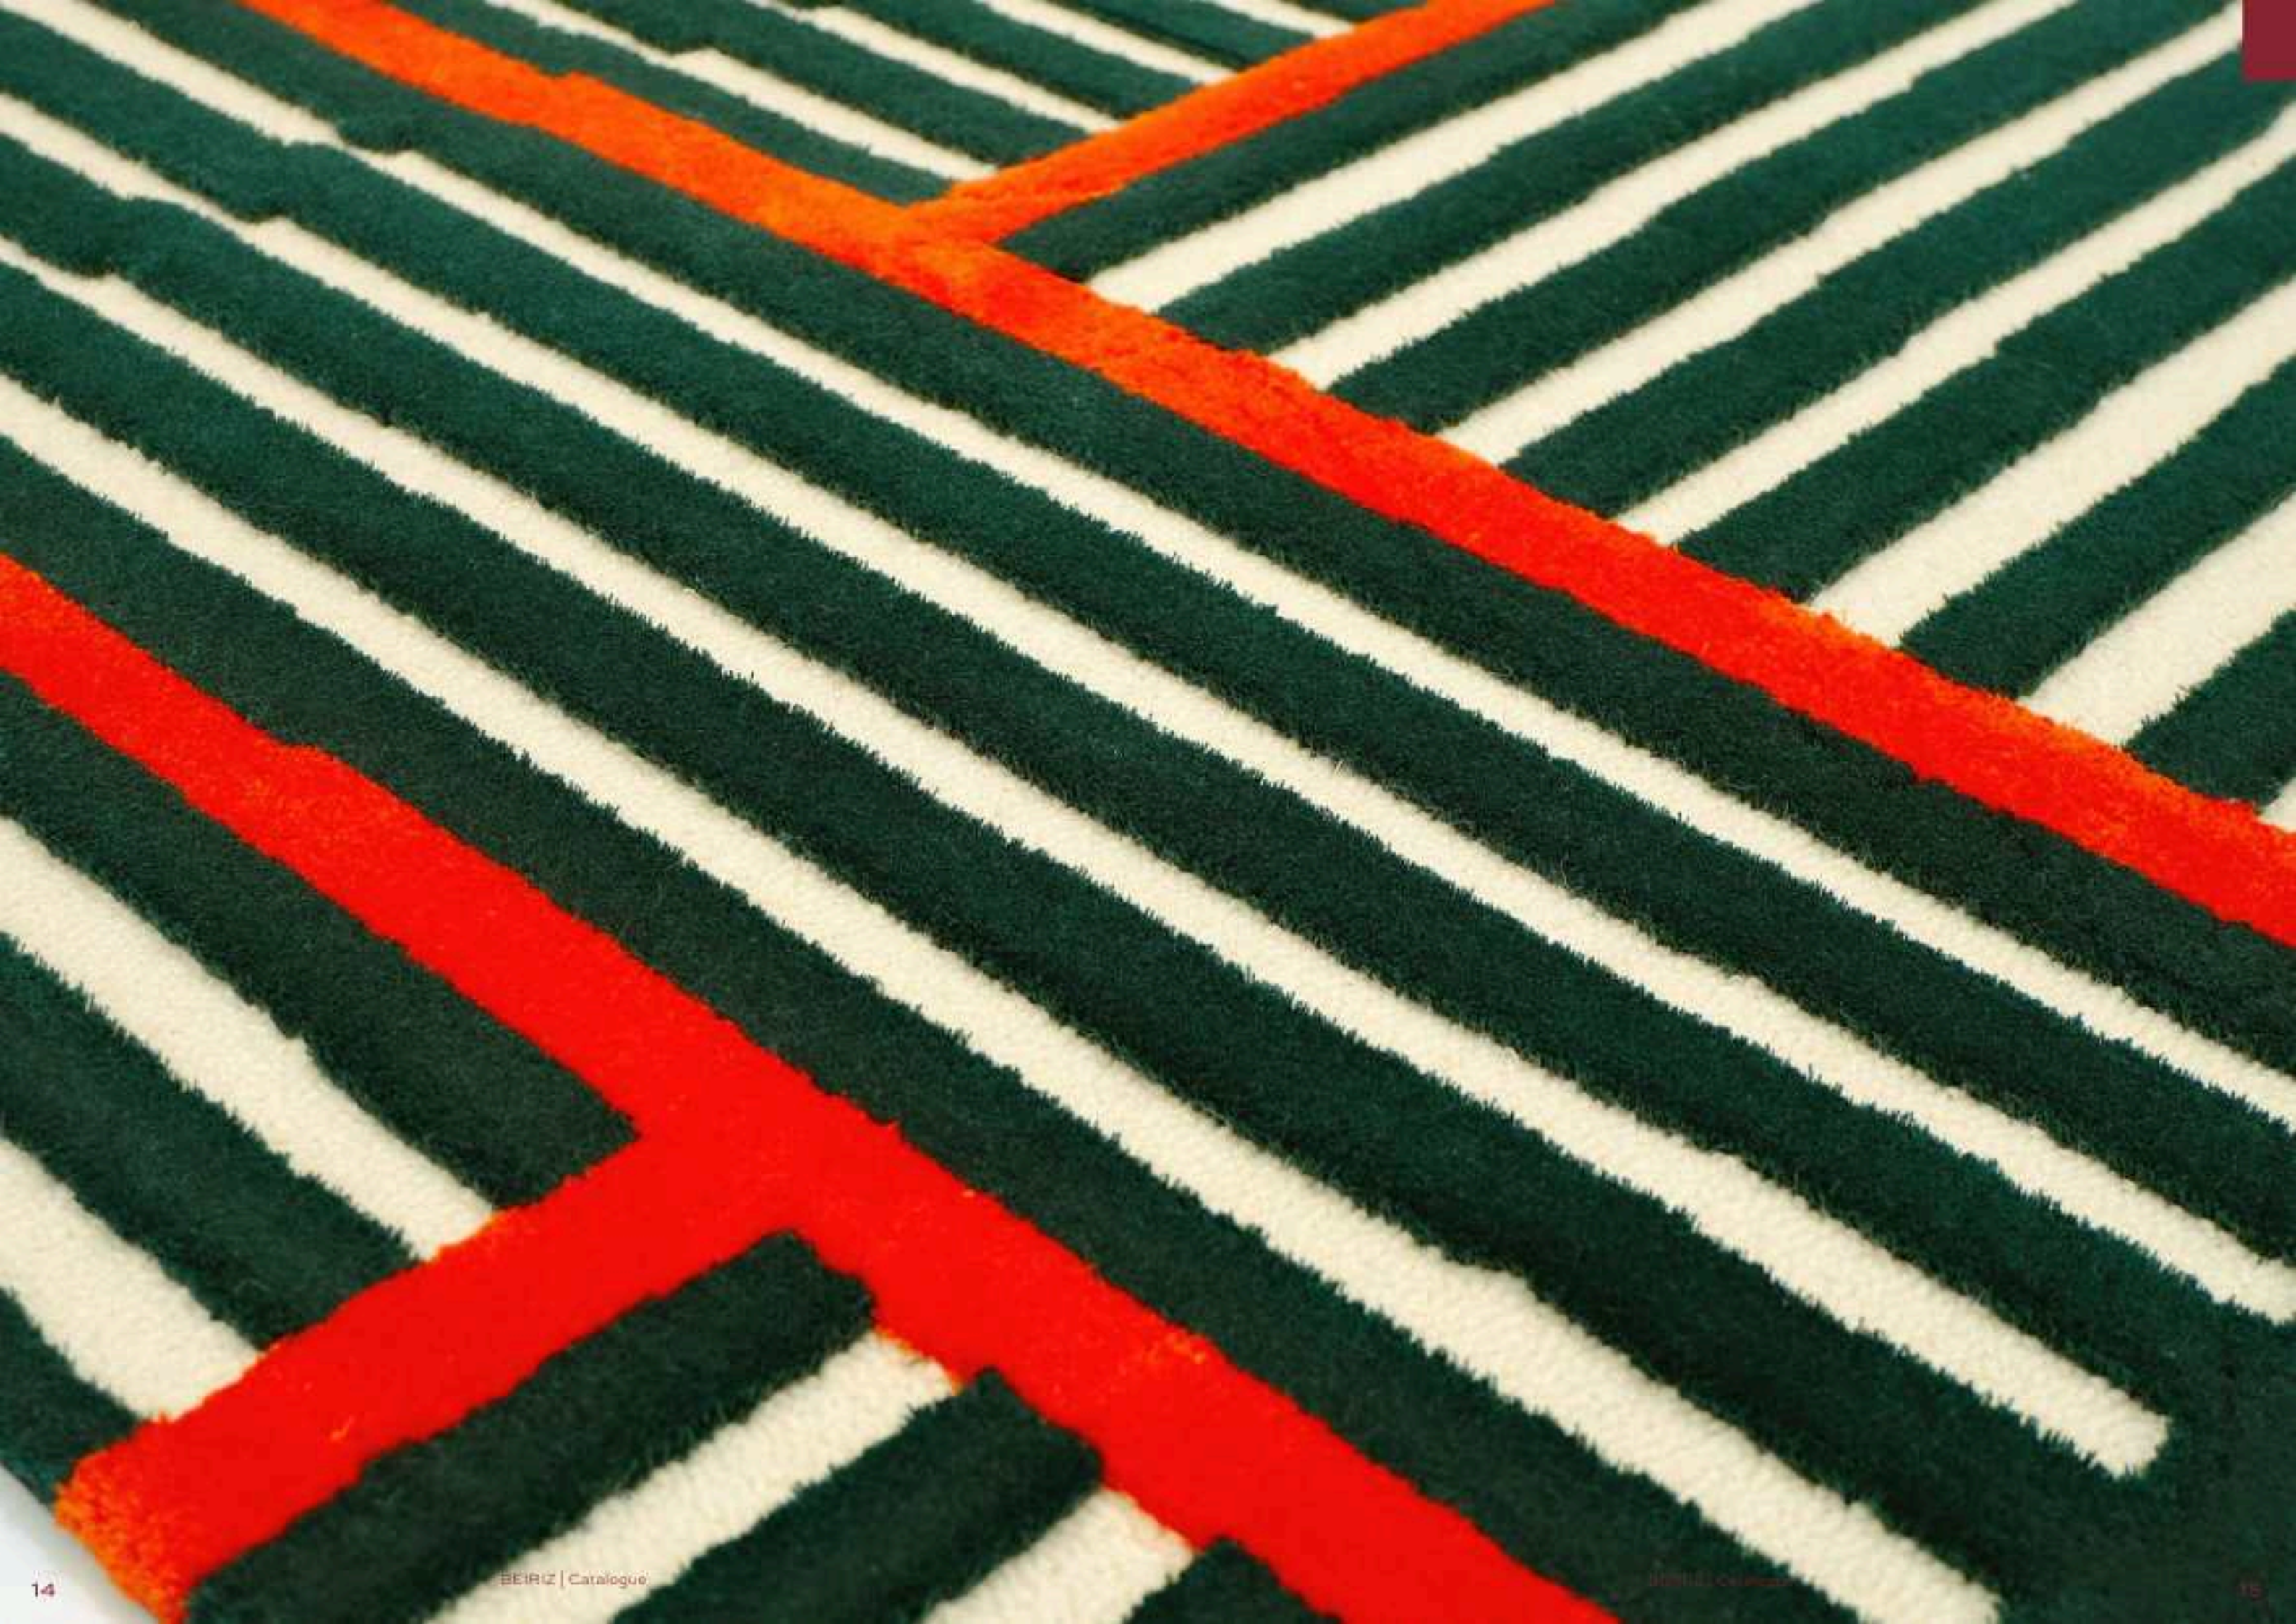

PRICE BAND

All price bands in this catalogue prevail over any other previous digital or printed catalogue of Beiriz. Details, specifications and prices may change at any time without prior notice.

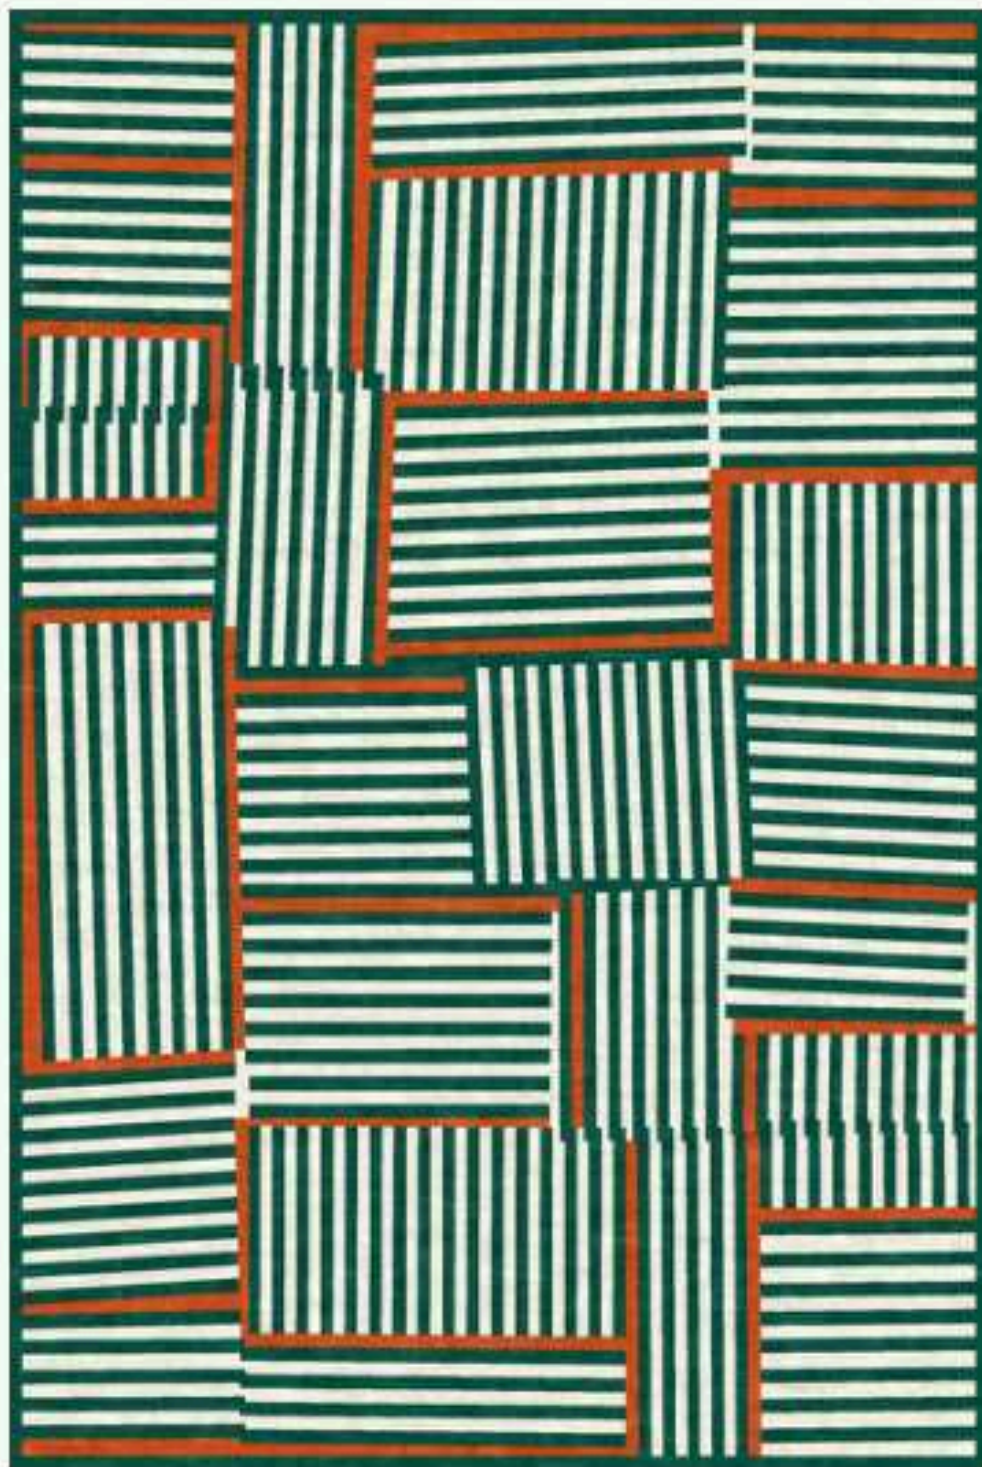

Geometric

This collection embodies modern sophistication, showcasing striking geometric patterns that add a contemporary flair to your decor. With a dynamic interplay of shapes and colors, these accents create a balanced atmosphere, making your space both stylish and inviting.

COMMITMENT & SUSTAINABILITY

OUR COMMITMENT TO ENVIRONMENTAL SUSTAINABILITY

QUALITY, SUSTAINABILITY & FLEXIBILITY

At Beiriz, *sustainability* is fundamental to our approach. We are dedicated to creating carpets that not only enhance spaces but also reflect a deep commitment to environmental responsibility.

Our focus on *quality* ensures that we select materials that are both beautiful and eco-friendly, such as wool, cotton, TENCEL™, bamboo, and recycled polyester. By prioritizing these options, we minimize our products' impact on the planet.

We take pride in our production model, which is based on creating carpets per order rather than engaging in mass production.

This approach allows us to give the right time and attention to each project, ensuring that every carpet is crafted with care and precision.

By avoiding mass production, we significantly reduce waste, further enhancing our sustainability efforts.

Our commitment to sustainability encompasses ethical sourcing and production practices that prioritize the well-being of our environment. We strive to reduce waste and energy consumption throughout our processes, ensuring that every step we take contributes to a healthier ecosystem.

Recognizing that our clients care about the impact of their choices, we are dedicated to crafting carpets that align with sustainable practices, allowing you to create beautiful and responsible projects.

At Beiriz, we recognize the importance of environmental sustainability in today's world. Our mission encompasses a comprehensive approach that integrates quality, sustainability, flexibility, and ecological responsibility into every aspect of our business. We strive to create beautiful carpets that not only enhance your living and working spaces but also contribute positively to the health of our planet. Below, we outline our core principles that guide our commitment to environmental sustainability.

Our *flexibility* enables us to adapt to the diverse needs of our customers, offering personalized solutions that reflect their values while maintaining our high standards.

At Beiriz, we believe that every carpet tells a story of care for both the environment and the spaces we inhabit. Together, we can foster a more sustainable future, where quality, sustainability, and flexibility work hand in hand.

MAINTENANCE & CARE

MAINTENANCE & CARE

REASONABLE EXPECTATIONS

After installation, rugs may show temporary wrinkles that disappear over time. Regular vacuuming prevents dirt from settling and prolongs the rug's life. Rugs should be rotated to ensure even wear, and direct sunlight should be avoided to prevent color fading. Beiriz uses the finest fibers in the textile industry; however, certain variations may occur, none of which are considered manufacturing defects.

FLUFFING OR SHEDDING

New carpets may fluff or shed short fibres. This occurrence is not considered a manufacturing defect but a natural occurrence. Frequent vacuuming is suggested up to six months after installation.

SPROUTING

Occasionally, tufts will dislodge from the backing of the carpet. These loose ends should simply be trimmed flush with the surrounding surface pile with sharp scissors. Excessive sprouting is often caused by wheels of luggage carts, castors, inadequate or improper use of vacuums, and is not considered a manufacturing defect.

SHADING (WATERMARKING, POOLING, PILE REVERSAL)

Shading is caused by the different effects of light playing off the sides of fibres versus their cut ends. Shading is a normal phenomenon for any cut pile carpet made from any type of yarn. It does not indicate wear, fault in manufacturing, flaw in materials or a combination.

FADING

Natural oxidation of dyes will occur, especially when a carpet is exposed to sunlight. This is not considered a defect in manufacturing or materials.

FUZZING

Fuzzing is caused by wheels of luggage carts, castors and inadequate or improper use of vacuums. Use of a vacuum with a beater bar or harsh brushes can also cause fuzzing.

CARPET MAINTENANCE TIPS

VACUUMING

Carpet must be vacuumed routinely.

1. Light to moderate traffic areas: vacuum at least every 2 to 3 days.

2. Heavy-traffic and pet areas: vacuum daily.

Routine vacuuming is the most important part of any maintenance program.

We recommend the usage of a good vacuum system regularly with an average power of 2000w.

TREATMENT OF SPOTS AND SPILLS

1. Check for spots daily and treat immediately.

2. Act Quickly! The longer the delay, higher the probability for a permanent stain.

3. Blot liquids with a dry, white, absorbent cloth or plain white paper. Do not scrub the area. Continue to blot until the area is essentially dry.

4. Gently scrape up semi-solids with rounded spoon and vacuum. Do not add moisture.

5. Remove spots and stains with water first. The spill may be simply removed with just water.

6. When using stain removal cleaners, follow the manufacturer's recommendations for use, including proper ventilation.

STORAGE

When storing a rug, it is essential to roll the piece rather than fold it, as folding can cause permanent wrinkles, even in the short term. Always vacuum the rug before rolling. Place a cardboard tube of the same length at one end and roll the rug around it as tightly as possible. Fasten the roll securely with adhesive tape and store it in a clean, dry room. Long-term storage should be avoided.

CLEANING BY PROFESSIONALS

There are different methods available for deep cleaning. To ensure the best results and that the right technique is applied to the specific fibers of each rug, we recommend contacting a professional cleaning service. Ask your local rug and carpet cleaning professional about the injection/extraction method, which allows a deep cleaning with low temperatures and a rapid extraction of the liquid. Don't wait until dirt is clearly visible, as cleaning becomes more difficult and may shorten the rug's lifespan. We advise to contact a professional and recognized rug cleaning company.

MATERIAL

Our material collection embodies luxury and pride in every carefully chosen element. It combines durability, sustainability, and softness with beautiful aesthetics. To assist you in selecting the perfect carpet, we provide detailed descriptions of each material's potential.

MATERIAL

NEW ZEALAND WOOL

New Zealand Wool is derived from the fine and refined wool of New Zealand sheep, celebrated for its matte finish and remarkable resilience.

This material is a staple in the textile industry, known for its enduring aesthetic appeal.

The wool fibers are naturally coated with lanolin, a thin layer of waxy grease that provides inherent protection against water, dirt, and stains. This unique characteristic, combined with the high density of the fibers, makes New Zealand Wool an ideal choice for high-traffic areas, ensuring durability and a long-lasting appearance.

Choosing New Zealand Wool is a testament to quality and practicality. Its natural resistance to dirt and stains, along with its strength, makes it ideal for high-traffic areas. Additionally, it is breathable and durable, ensuring long-lasting performance and comfort in any setting.

FINE WOOL

Fine Wool is a natural and biodegradable material, sourced from the finest thin wool fibers.

Renowned for its beautiful shine and remarkable resilience, this exquisite wool offers a luxurious and contemporary aesthetic. The thin wool fibers are naturally coated with lanolin, providing inherent protection against water, dirt, and stains. This unique feature, combined with the high quality of the fibers, makes Fine Wool an excellent choice for discerning environments, ensuring both elegance and durability.

Its natural resistance to dirt and stains, along with its strength, makes it ideal for high-end applications where a delicate yet resilient material is essential. This wool not only enhances product design but also delivers practical benefits for everyday use.

TENCEL

Tencel™ is a revolutionary fiber derived from wood pulp cellulose through a highly efficient and eco-friendly process. This natural, biodegradable, and compostable material reverts to nature, minimizing environmental impact. As a vegetable yarn, it is carefully collected from consciously managed forests, ensuring a reduced environmental footprint. The result is a luxurious and comfortable yarn that is breathable, soft on the skin, and has excellent moisture absorption.

Choosing Tencel signifies a commitment to responsible luxury, as its natural origins and low environmental impact combine with remarkable performance, creating the perfect blend of luxury and eco-friendliness.

BAMBOO

Bamboo fibers are a natural, sustainable material known for their unique combination of eco-friendliness and performance. The rapid growth of bamboo plants makes them a highly renewable resource, appealing to environmentally conscious consumers. The extraction process is carefully managed to minimize environmental impact, resulting in a durable and long-lasting material suitable for various applications.

Bamboo fibers offer a luxurious texture and softness, creating a glossy finish ideal for diverse projects.

Choosing Bamboo fibers means embracing sustainability while benefiting from their breathability and resistance to pilling, ensuring a beautiful and enduring finish.

COTTON

Cotton fibers are a natural, cellulosic material derived from the fluffy cotton plant. Renowned for their softness and durability, cotton is hypoallergenic, making it suitable for those with sensitive skin.

Choosing cotton means opting for a sustainable, delicate, and comfortable yarn that is reliable material for a gentle everyday use.

BIODEGRADABLE PET

Biodegradable Pet (Recycled Polyester) is a synthetic fabric made from post-consumer recycled materials, such as plastic bottles. This eco-friendly alternative to virgin polyester significantly reduces carbon footprints and plastic waste, making it a responsible choice for environmentally conscious consumers.

The yarn is soft, easy to clean, and features a matte finish, while also being more durable than many other synthetic fibers. It is 100% biodegradable in landfills and oceans within 12 months, enriching the soil and eliminating microfibers in the ocean.

Choosing a material that is both soft and environmentally friendly embraces sustainability and innovation, certified by the Global Recycled Standard (GRS).

For expert advice and to explore our material collection, please do not hesitate to contact us. Our team is dedicated to guiding you in selecting the ideal material for your project, ensuring it aligns with your unique needs and aesthetic vision.

HERITAGE

Since its founding, the company has been committed to preserving techniques that celebrate Portuguese culture. This dedication to heritage ensures that each Beiriz rug showcases a seamless blend of traditional craftsmanship and contemporary design.

HERITAGE

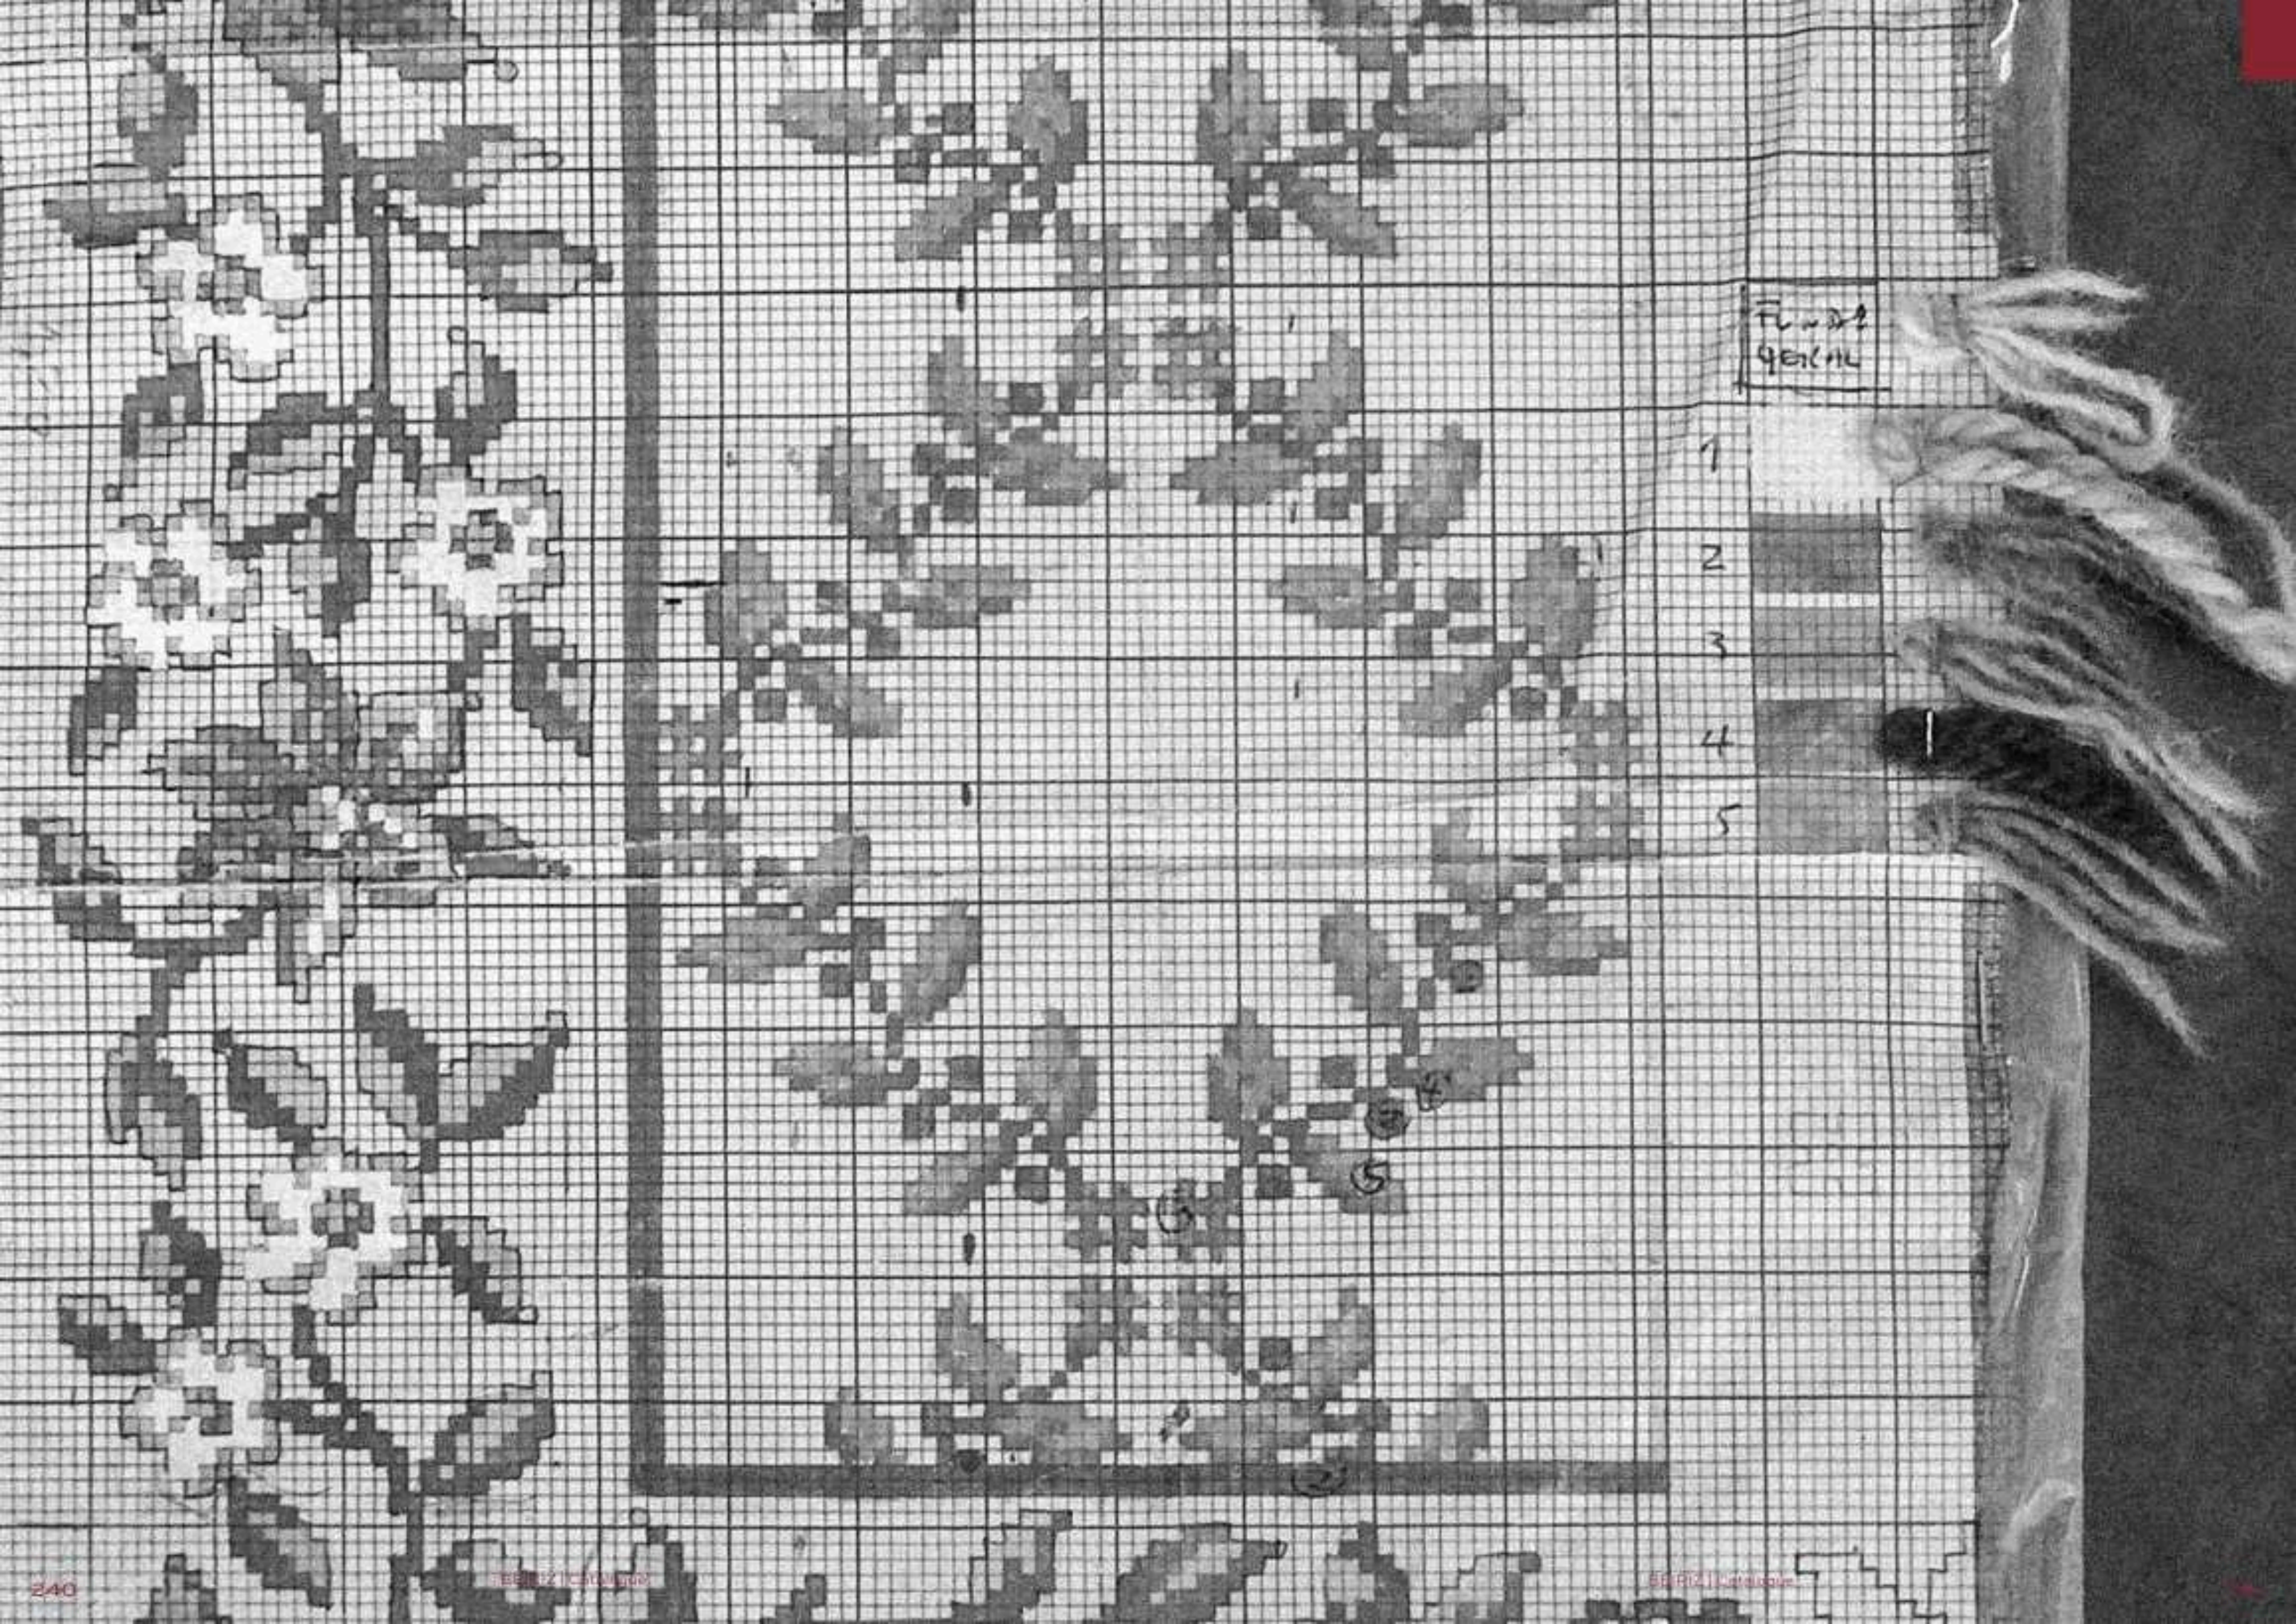

SINCE 1919

Over a century ago, Beiriz began producing high-quality rugs on wooden looms, each featuring its own original and unique design. Founded on July 17, 1919, by Hilda D'Almeida Brandão Rodrigues Miranda and her husband, Carlos Rodrigues Miranda, the company started as a small workshop with just six employees. In a short time, the factory expanded to employ around a hundred workers.

The rugs crafted using the "Beiriz" knot became highly valued, as this technique contributed to the company's reputation, particularly for their intricate decorative patterns.

Weavers would "sing" the colours from charts that illustrated the designs, and through their exceptional skill, they created patterns that made Beiriz rugs excellent representatives of Portuguese artisanal production.

At Beiriz, we honour the rich tradition of craftsmanship that has defined our brand for over a century. We blend the time-honoured techniques of the original Beiriz Rug Factory with modern technologies, allowing us to create pieces that meet the diverse needs of our clients. This combination of tradition and innovation enables us to bring unique contemporary designs to life with exceptional quality.
